□ § 326-9.1 Zone Overviews.

**TCE** Boulevard Zone Overview

The primary intent of this zone is to create an attractive entrance and boulevard route into and through the City Center neighborhood, as a transition from the larger Route 146 to the smaller side streets.

Along Clifton Country Road, a revitalized streetscape of trees, decorative lighting, landscaped multi-use path and sidewalks will be framed by inviting and attractive architecture. Existing front parking lots will gradually be transformed into attractive community and economic amenities, from outdoor patios and cafes to well-designed and interesting facades, where each building offers an attractive and inviting view of the ground-floor activities within. From storefront window displays, to outdoor dining areas amidst beautiful landscaping, as one travels from building to building and business to business, there is a continual offering of design elements to engage one's interest.
